SECTION II. OCCUPATIONAL ACTIVITIES [Study investigators to decide if this section is to be completed by individuals working part-time as well as full-time.]

Now, some questions about your employment situation.

12. What is your occupation? (if more than one job, describe your occupation for the job with the most hours worked per week)

13. What is the name of your employer, business or company?

14. What kind of business or industry is this? (For example, hospital, newspaper publishing, mail order house, auto engine manufacturing, etc.)

15. What are your most important specific activities or duties? (For example, selling cars, keeping account books, etc.)

1. _____

- c. Walk
- d. Lift heavy loads
- e. Sweat from exertion

Occupational Index = $\sum(q17, q18, q19b-e, (6-q19a), \text{occupational intensity code})/8$; occupational intensity code comes from Questions 12-16 which are used to code occupation according to Department of Labor Occupational Codes; intensity code of 1 = low, 3 = medium, and 5 = high is then assigned to occupational code depending on physical demands of occupation

SECTION III. ACTIVE LIVING HABITS

This next section asks about the general level of physical activity involved in your daily routine during the past year.

20. How many minutes a day do you usually walk and/or bicycle to and from work, school or errands? 1-2-3-4-5
($<5/\geq 5$ but $<15/\geq 15$ but $<30/\geq 30$ but $<45/\geq 45$)
21. Did you watch television? 1-2-3-4-5

$$\text{Active Living Index} = \sum(q_{20}, q_2, q_{23}, (6-q_{21}))/4$$

SECTION IV. PARTICIPATION IN SPORTS AND EXERCISE

Finally, we want to ask you about your participation in sports and exercise during the past year.

(Much less/Less/Same as/More/Much more)
25. Did you play sports or exercise? 1-2-3-4-5
(Never or less than once a month/Once a month/2-3 times a month/Once a week/More than once a week)
26. Did you sweat from exertion during sports or exercise? 1-2-3-4-5
(Never or less than once a month/Once a month/2-3 times a month/Once a week/More than once a week)

27. During the past year, did you participate in any other similar activities not included in the list?
(yes/no)
28. Which sport or exercise did you do most frequently? (Specify only one) _____ Intensity: 0.76-1.26-1.76

29. How many months in this past year did you do this activity? Proportion: 0.04-0.17-0.42-0.67-0.92
($<1/1-3/4-6/7-9/>9$)
30. How many hours a week did you usually do this activity? Time: 0.5-1.5-2.5-3.5-4.5
($<1/\geq 1$ but $<2/\geq 2$ but $<3/\geq 3$ but $<4/\geq 4$)

31. Did you do any other exercise or play any other sport in this past year?
(yes/no)

[If yes, respondent continues with following questions]

32. What was the second most frequent sport or exercise you did? (Specify only one) _____ Intensity: 0.76-1.26-1.76
(code specified activity as <4METs/4-6 METs/>6 METs)

33. How many months in this past year did you do this activity? Proportion: 0.04-0.17-0.42-0.67-0.92

(<1/≥1 but <2/≥2 but <3/≥3 but <4/≥4)

Sports and Exercise Index: $\sum(q24-26, \text{simple sport score})/4$; simple sport score is calculated by multiplying intensity by proportion by time for each specified activity and summing over number of activities (q28, q32 and q36); if no activities are specified, the sum will be 0; simple sport score will take on value of 1-2-3-4-5 corresponding to scores of 0/0,01-<4/4-<8/8-<12/≥12.

NOTE: The numbers in the right-hand column are the numerical values to be assigned to respective response categories specified in the parentheses below each question.
